MISSION

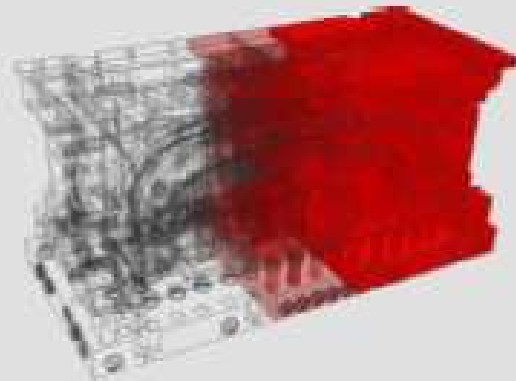

The Electromac Group is firmly committed to, and actively participates in the continuous process of quality improvement, and focus on product reliability, maintainability and durability.

Our team is committed to providing customers with leading edge technology, innovation and assurance of added value at reasonable cost.

Our primary objective is to consistently exceed the requirements and expectations of our customers through efficient and effective performance, quality workmanship, professionalism and delivery on time, every time.

VISION STATEMENT

To work as true partners with our customers to assist them in achieving their operational goals and objectives by providing exceptional value in everything that we do. We will provide opportunities for our team to grow and develop as industry leaders as we serve our customers and each other.

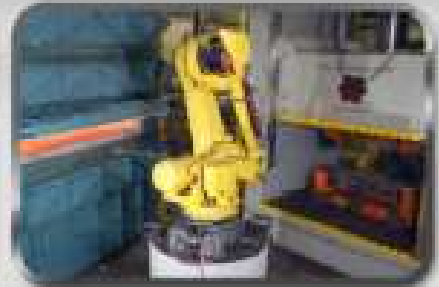

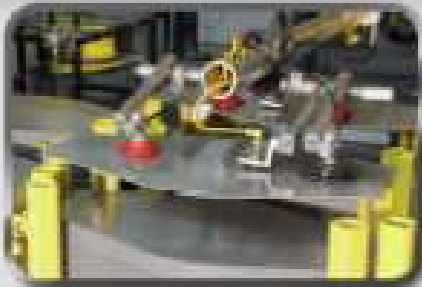

CORE VALUES

- Customers come first. Our first priority is exceeding customer expectations in quality, delivery and value.
- Integrity in all we do. Integrity is the key to building strong relationships with co-workers, customers, suppliers and our communities.
- Continuous improvement in every aspect of our business. Implement and sustain safe, lean processes to drive out waste, improve productivity and utilize assets.
- Innovative, concurrent engineering for growth. Be an extension of our customer's product development team.
- Best talent – one team. Our employees are high performing entrepreneurial professionals who know their customers and markets.

OUR FACILITIES

OUR SERVICES

The Electromac Group excels in all of the key program facets, including: Program management, Product design, Tooling design & build, Forming simulation, Production intent prototyping and full volume Production. It is this breadth and depth of expertise & rigorous execution that continues to set The Electromac Group apart from the balance of the field.

The Electromac Group specializes in the efficient manufacture and reliable operation of transfer dies, robotic tandem line dies, progressive dies and press hardening (hot stamp) tooling. Our Engineering Team has established themselves as world leaders in the pivotally important process & design element of the project - this, complemented by a state of the art tool build facility supported by highly talented tactical specialists, accessing the latest efficiencies that technology has to offer - completes the cycle.

Electromac continues to passionately drive success for our strategic partners in the appliance, automotive component, and heavy truck industry. We are solution minded - with a proven track record that demonstrates, time and again, superior performance in the reliable supply of quality structural frame components, body components & attachment brackets, oil pans as well as Class A surface panels such as bumpers and step rails.

- Product Design & Process Simulation
- Press Hardening / Hot Stamping Prototype, Tooling & Production
- Cold Stamping Transfer, Tandem, Progressive Prototype, Tooling & Production
- Production Laser capabilities
- Factory Assists – Tooling and Production Support
- Laser Scanning & Reverse Engineering
- Full Laboratory Validation – Hot Stamping
